PROFESSIONAL SUMMARY

AI Engineer with 1 year of industry internship experience delivering production ML systems, computer vision pipelines, and LLM-powered automation across healthcare, hospitality, and education verticals. Proven ability to own projects end-to-end — from problem definition and model development to deployment and stakeholder-facing dashboards. Comfortable working independently and shipping solutions that non-technical users can actually operate.

TECHNICAL SKILLS

Languages: Python, SQL

AI / ML: Machine Learning, Computer Vision, LLMs, Agentic AI, PyTorch, Scikit-learn, OpenCV

Frameworks & Tools: n8n, Jupyter Notebook, VS Code

Databases: MongoDB, MySQL

Analytics & BI: Power BI, Tableau

Spoken Languages: English, Hindi, Kannada

EXPERIENCE

Airobotsoft Products and Services Limited

Jan 2025 – Present

AI Engineer | Bangalore, Karnataka

- ▶ Worked on 2 production AI systems across education, hospitality, and healthcare verticals — each deployed to real end users, not just prototyped.
- ▶ Built an LLM-powered WhatsApp restaurant assistant using n8n and WhatsApp Business Cloud API, fully deployed at a live restaurant; automated menu display, order capture, and party hall reservations with zero manual intervention during operation.
- ▶ Developed a real-time classroom monitoring system using OpenCV and Django, automating attendance tracking and behavioural analysis — replacing a fully manual process with an instant, dashboard-driven workflow.
- ▶ Consistently delivered AI solutions independently: data preprocessing → model training → REST API → frontend dashboard → MongoDB storage.

Airobotsoft Products and Services Limited

Sep 2024 – Dec 2024

AI Engineering Intern | Onsite

- ▶ Contributed to ML model development and data preprocessing pipelines for 2 business automation projects, handling data cleaning, feature engineering, and model evaluation cycles.
- ▶ Gained end-to-end exposure to AI deployment workflows — from Jupyter prototyping to production-ready Python scripts — accelerating transition to a full engineering role within 4 months.
- ▶ Participated in requirement gathering and sprint reviews, developing ability to translate business problems into technical AI specifications.

KEY PROJECTS

AI-Based Smart Classroom Monitoring System

Python · OpenCV · Django · ReactJS · MongoDB

- ▶ Replaced fully manual attendance with a real-time face recognition pipeline — processing live video frames and auto-logging attendance in under 30 seconds per session.
- ▶ Built an admin dashboard surfacing attendance trends, engagement analytics, and behavioural flags — designed for instructors with no ML background.
- ▶ Architected the full stack: OpenCV video pipeline → Django REST API → ReactJS frontend → MongoDB; handled concurrent video streams without degradation.

GitHub: github.com/sohil9999/ai-based-smart-classroom-monitoring-system

AI Waiter — Conversational Restaurant Assistant *n8n · WhatsApp Business Cloud API · LLMs · Agentic Workflows*

- ▶ Deployed at a live restaurant — handled real customer interactions for menu queries, order management, and party hall bookings via WhatsApp.
- ▶ Designed multi-turn agentic conversation flows managing the full order lifecycle without staff intervention, reducing response time from minutes to under 5 seconds.
- ▶ Sole owner of architecture, prompt engineering, n8n workflow design, API integration, and QA testing.

Neurological Disorder Detection via Gait Analysis

Python · OpenCV · Scikit-learn · Streamlit

- ▶ Built a real-time video processing pipeline that extracts biomechanical gait features to classify early-stage neurological impairments — a clinically complex, multi-class problem on noisy video input.
- ▶ Applied and compared multiple classifiers (SVM, Random Forest) on time-series movement data; selected best-performing model through cross-validation.
- ▶ Designed an accessible Streamlit interface enabling paralysis patients to interact with the system independently, without specialist support.

EDUCATION

Coorg Institute of Technology, Ponnampete <i>B.E. – Artificial Intelligence & Data Science CGPA: 7.5 / 10</i>	2022 – 2026
Govt. PU College, Kudige <i>Pre-University (PCMB) 70%</i>	2020 – 2022
St. Michael's High School, Madikeri <i>SSLC 82%</i>	2020

CERTIFICATIONS

- ▶ AI Engineering Internship Completion Certificate — Airobosoft Products and Services Limited | Sep 2024 – Dec 2024
